3, 6, 3

The Ambassador called and said he had just spoken to President Osorio and the President had authorized him to accept the United States draft of resolution. However, the President recommended a change in the clause relating to agents. He suggests, if possible, that measures be adopted to prevent all travel of agents of international communism between this hemisphere and territory dominated by international communism and not between Guatemala alone and territory dominated by international communism. The Ambassador said that he was authorized to participate at any time that we wanted in the drafting of whereas clauses.
